

PERFECTION

Iggesund Forest has a wider range of harvester bars than any other manufacturer on the market. All bars come with optimal stability and our unique heat treatment makes them rigid and durable.

IGGESUND FOREST
BLUESLINE

Iggesund Forest is one of the world's largest manufacturer of bars for mechanized forestry. All our manufacturing takes place in our factory in Strömsbruk, Hälsingland.

For many years, our approach has been to continually improve and refine our products to achieve the highest quality. Each individual sawbar undergoes a quality inspection before delivery and we can therefore guarantee a high quality product.

Since 2011, we are part of the same group as Olofsfors AB, based in Nordmaling, Västerbotten. This has given us further advantages in terms of development and material testing.
